

Laufzettel Safety – HARBOR

As a coworker of the University of Hamburg, and particularly HARBOR, you are required to complete a set of general safety trainings. These are repeated annually. These training sessions ensure you are aware of how to work safely and how to react in emergency and danger situations.

As well as the general safety training of the Institute and HARBOR, in order to have access to specific laboratories and rooms you are also required to complete additional specific safety training to ensure you are aware of the local hazards and emergency procedures in each laboratory/room. Without this your transponder will not be activated for access to these rooms. To ensure that you have completed all the required training, this sheet details and logs your specific training requirements, as well as giving details of the relevant safety contacts in the Institute and HARBOR.

As the University of Hamburg does not currently maintain a central database of safety training, this form provides you with a log of your training activities, in which you have confirmed by your signature that you have attended and understood all the required training activities. It acts as your personal certificate of access permission for the specified laboratories and rooms and will be kept in your group's safety files.

Please further support your group leader in fulfilling their legal responsibilities for health and safety in work by also ensuring you complete and document your annual refresher safety training.

Laufzettel Safety – HARBOR

Surname, first name: Damerow, Hauke

E-Mail: *hauke.damerow@uni-hamburg.de*

Start date: 15.09.2026

Group: AG Bester

Position: PhD

End date: *14.09.2029*

¹ This training session must be repeated annually

² The training session of all equipment must be repeated after a working break of 6 months or more

³ This training only covers the 3D printers in the glovebox-lab 1044. The printer in the small equipment room 24a requires separate training.

With your signature you confirm that you have attended and understood the contents of all the required training activities.

You also confirm that you that you undertake to comply with the good working practices presented and associated legal requirements.

Should you require access to additional rooms/facilities not covered in this document you undertake to inform and discuss this with your supervisor and to complete and abide by any additional required safety training. Documentation of this will be appended to this document.
