MASTER'S CERTIFICATE

The Faculty of Mathematics, Informatics and Natural Sciences of the University of Hamburg
hereby awards

Hauke Damerow

born on 19 January 2000 in Bremen

the academic degree of

Master of Science (MSc)

for passing the examination in **Physics** on 2 October 2025.

Final grade: **excellent**

Hamburg, 3 December 2025

Prof. Dr. Dieter Horns
Chairman of the Board of Examiners

EXAMINATION CERTIFICATE

Hauke Damerow

Master of Science (MSc) Physics

Hauke Damerow, born on 19 January 2000 in Bremen, successfully passed the master's examination in Physics on 2 October 2025. The following grades were achieved in the master's exam, in line with the subject-specific provisions of 4 April 2018 for Physics at the University of Hamburg:

Advanced Master's Courses

Computational project* Recognized achievement (Université de Strasbourg)	excellent	(1,0)
Interactions in soft cond* Recognized achievement (Université de Strasbourg)	excellent	(1,0)
Materials research with synchrotron radiation and neutron: from nanostructures to the component	excellent	(1,0)
Surfaces and interfaces* Recognized achievement (Université de Strasbourg)	excellent	(1,3)
Advanced statistical mechanics* Recognized achievement (Université de Strasbourg)	excellent	(1,3)
Computational physics with focus on time-dependent quantum mechanics*	excellent	(1,3)
Quantum technology 2: Atoms and solids	excellent	(1,0)
Many body-physics* Recognized achievement (Université de Strasbourg)	good	(1,7)
New experiments with XFEL sources*	excellent	(1,0)
Seminar about x-ray spectroscopy with FELs and synchrotrons for catalytic and functional materials	excellent	(1,3)
Quantum technology 1: Atoms and photons*	excellent	(1,3)

Complementary subject

Computer applications in physics: numerical and statistical methods	pass	(b)
Fundamentals of Meteorology and Climate	pass	(b)
Radiation and Climate*	pass	(b)

Research Phase

Introductory project (Laser physics and photonics)	pass	(b)
Preparatory project (Laser physics and photonics)	pass	(b)

Master thesis

Master's thesis	good	(1,7)
-----------------	------	-------

Fast absorption parameterization and radiative flux computation with the atmospheric radiative transfer simulator ARTS
(in original language)

Final grade	excellent	(1,44)
-------------	-----------	--------

Hamburg, 3 December 2025

Examination Office, signature

ECTS Grade Distribution Table final grade

Department/degree	excellent	good	satisfactory	sufficient
Department of Physics/Master	67,60%/217/67,60%	29,91%/96/97,51%	2,49%/8/100,00%	0,00%/0/100,00%

As a rule, there is a minimum of 50 graduates per cohort; if applicable, a cohort with fewer graduates is indicated. A cohort or reference group is comprised of three academic years. The finale grades for the department-degree combination that are used for official statistics form the basis for the designation of a percentile ranking. The percentage, the absolute value, and the cumulative frequency are indicated.

Grading system per component: 1,0 / 1,3: excellent; 1,7 / 2,0 / 2,3: good; 2,7 / 3,0 / 3,3: satisfactory; 3,7 / 4,0: sufficient

Grading system, GPA: 1,0 to 1,50 excellent; 1,51 to 2,50: good; 2,51 to 3,50: satisfactory; 3,51 to 4,0: sufficient
